

**International Conference on “New Trade Policies and Flow of Capital Under  
De-Globalization in the Emerging Economies”  
(December 30-31, 2018)**

**Dr Usha Nori & Dr Sandeep Kumar Kujur : Conference Conveners**

### **Conference Theme**

The last few decades were celebrated as the era of globalization heightened due to inexorable cross border trade, movement of capital and people. Expansion of trade is much faster across nations thus scaling up the total trade to 50% higher than production. On the other, financial globalization has proceeded at an even more rapid pace than trade globalization over the past few decades. Further, the number of people residing on foreign land grew by more than a quarter. But today, the protectionist policies advocated by the advanced world portend the start of a new era –perhaps one of de-globalization. Economists pursue that the cause for retreat of globalization is Brexit and Trump’s rise and is viewed as second wave of de-globalization. This reversal policy stance may set a new direction for the global trade patterns and capital flows. In view of shift in the policy perspective of advanced economies and changing scenario of economic growth and employment in emerging economies, policy makers now have to reset the new trade policies and financial systems for the healthier trade and investment flows that support economic growth.

It is in this context, Institute of Public Enterprise (IPE) Hyderabad proposed to organize a two-day international conference on “New Trade Policies and Capital Flow under De-Globalization in the Emerging Economies”.

### **Conference Objective**

The objective of the proposed Conference is to stimulate the academic discussion and debate on new trade policies and flow of capital under de-globalization era in the world, especially in the emerging economies.

### **Conference Sub-themes**

Towards this the conference calls for the submission of unpublished theoretical, empirical and analytically policy relevant papers on different sub-themes mentioned below.
