# 11<sup>th</sup> International Conference on Governance, Responsibility and Sustainability: Challenges for New Gen Economies

*Think Global, Work Ethical*

*"Corporate governance is concerned with holding the balance between economic and social goals and between individual and communal goals. The governance framework is there to encourage the efficient use of resources and equally to require accountability for the stewardship of those resources. The aim is to align as nearly as possible the interests of individuals, corporations and society."*

## Introduction

In the midst of a fast shifting global market landscape and new problems such as digitalization, climate change, and shifting investor expectations, firms need to prioritize sustainability, responsibility, and accountability towards their stakeholders. Stronger growth and more inclusive societies are supported by good corporate governance, which contributes to the establishment of the trust, transparency, and accountability climate needed to promote long-term investment, financial stability, and commercial integrity. These days, companies are making it a top priority to advance corporate governance best practices in order to strengthen their bonds with stakeholders. These businesses develop and cultivate connections based on interaction and communication while cognizant of the numerous stakeholders that surround each business organization.
